

Cost of adding batteries to solar

How much does it cost to install a solar battery system?

Most whole-home solar battery systems require a professional installation--especially if you need to rewire your home or directly work with your electrical wiring in any way. Hiring a local solar contractor to install your solar battery system costs anywhere from \$2,000 to \$3,500 on top of the cost of the solar battery system itself.

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

Is solar battery storage worth the cost in 2025?

Whether solar battery storage is worth the cost in 2025 is totally up to you and your energy goals. If you experience frequent or long-lasting power outages, then having battery storage for backup power can be a game-changer in keeping you safe, productive, and comfortable (not to mention keeping your food from spoiling!).

Can I add a battery to my solar system?

So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options. Let's explore how easy it is to add a battery to your existing solar setup and what options you have based on your current equipment.

Should you invest in a solar battery system?

Whether you're ready to take your love of reusable batteries to the next level or make use of that excess solar energy your solar panels generate, investing in a solar battery system is a great way to harness the power of the sun for free electricity. But before you can start saving, you'll need to budget for the cost of a solar battery system.

How much does it cost to install a battery?

On average, it costs around \$1,300 per kWh to install a battery before incentives. With the 30% federal tax credit applied, the cost is closer to \$1,000 per kWh. Update: This tax is only available to home battery storage systems installed by December 31, 2025. Here's what that looks like for common battery system sizes:

Adding solar batteries to existing systems is your ticket to achieving these goals. In this blog post, we'll walk you through the process of adding solar batteries to your existing system, from understanding their role and benefits to choosing ...
