How much do solar panels cost in North Carolina?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average North Carolina homeowner needs a 13.03 kW solar panel system to cover their electricity needs, which comes out to \$30,841 before incentives. Prices range from \$26,215 to \$35,467, but after the federal tax credit, that drops by 30%.

How much money can you save with a solar system in North Carolina?

With North Carolina's property tax rate of 0.7% and an average system cost of \$33,705, you can potentially save \$235 annually. Over the 20-year lifespan of your system, that's a total of \$4,718. Keep in mind that actual savings will be lower due to system depreciation.

How much does solar cost in South Carolina?

The levelized cost of power from a typical solar system installed on a home in South Carolina over 25 years is 4.9 cents/kWh. This is significantly lower than the average cost of utility power over 25 years, which is 23.0 cents/kWh. Solar is a far cheaper way to power a home in South Carolina over the long term.

How much solar power does North Carolina generate?

In North Carolina, solar power is enough to power approximately 860,000 homes and contributes about 7.52% to the total energy production in the state. Solar power plays a significant role in the economy of North Carolina.

Is solar a good option in North Carolina?

North Carolina also has many solar incentives to make going solar more affordable. The state offers property tax incentives and discounts to encourage residents to go solar. You can also get rebates on solar water heaters. Plus, there are many low-interest solar loan options for residents of the Tar Heel State.

How long do solar panels last in North Carolina?

That's why over 34,000 North Carolina homeowners have used EnergySage to receive and compare quotes for solar installations. You can expect to earn back your initial solar investment through electricity savings in about 10.58 years, while most systems last at least 25 years.

**Key Points** Solar panels in North Carolina cost about \$31,590 before factoring in tax credits and incentives. North Carolina's growing solar industry makes it an excellent place to install rooftop solar panels, with many reputable North ...
