

Diy solar pond pump with battery backup

What can I do with a solar powered pond?

Bring still water to life- Adding a solar powered pump to your garden pond is the easiest way to add movement and life. Create a water fountain,water courses and lights in your pond without the need for mains power. Battery Backup - Featuring our advanced battery backup system with built in resettable memory function.

What is a solar panel water pump battery backup?

A solar panel water pump battery backup is a system that stores extra power in batteries during the day. This allows the solar water pump to operate when the sun goes down,extending the time your solar pond pump works at night in your pond or water feature.

What is a DIY solar water pump?

A DIY solar water pump involves a simple build that combines solar panels, a controller, and a DC water pump in a stand-alone system. In short, the solar array generates DC electricity to power the water pump. With this system, you can also add a backup battery for continuous use throughout the night or on a cloudy day.

How do I connect a solar water pump to a battery?

To connect a solar water pump to a battery,first connect the "Input" cable of the battery back-up to a solar module or a DC power supply,and tighten the protection screw if applicable. Then,insert the pump plug to the "Output" socket of the battery back-up,and also tighten the protection screw. Make sure to keep the solar water pump fully underwater when it operates.

What is a solar water pump kit?

Use this solar water pump kit to replace an existing pump of an old water feature or to convert it into a solar water feature. With six hours battery life when fully charged, this water pump is a reliable way to power your water feature. This pump is not only eco friendly but also has no running cost and is incredibly easy to set up.

How do I set up my solar water pump?

To set up your solar water pump,first insert the pump plug into the "Output" socket of the battery back-up and tighten the protection screw. Then,ensure the solar water pump is fully submerged underwater. Next,turn the On/Off switch on the battery to the ON position,which will cause the G-normal/R low status LED on the battery to show green and the solar pump to start operating.

Use this solar water pump kit to replace an existing pump of an old water feature or to convert it into a solar water feature. With six hours battery life when fully charged, this water pump is a reliable way to power your water feature.
