

Does ukraine have energy storage stations

Why is Ukraine investing EUR140 million in energy storage?

The EUR140 million total investment aims to enhance power grid stability, bolstering Ukraine's energy security and independence. The project will be the biggest operational energy storage portfolio in Eastern Europe at the time of commissioning.

How does Ukraine get its energy?

Energy in Ukraine primarily comes from gas and nuclear power, followed by oil and coal. Ukraine has a diversified energy mix, and no fuel takes up more than a third of the country's energy sources. Most gas and oil is imported, but since 2015 energy policy has prioritised diversifying energy supply.

What is Ukraine's energy policy?

Ukraine has a diversified energy mix, and no fuel takes up more than a third of the country's energy sources. Most gas and oil is imported, but since 2015 energy policy has prioritised diversifying energy supply. The coal industry has been disrupted by war, and as of 2024 over 70% of electricity generation is nuclear.

Is Russia targeting Ukraine's energy system?

Ukraine's energy system has been regularly targeted by Russia since its full-scale invasion in 2022, with attacks intensifying since the spring of 2024. The targeting of energy infrastructure has had wide-ranging consequences for the provision of energy to Ukrainian households and other consumers.

Is Ukraine's heat supply at risk?

Heat supply is also at risk in Ukraine's capital, Kyiv." In 2024 the IEA recommended engaging consumers in energy saving and demand response, while continuing investments in energy efficiency.

How important is Ukraine's energy sector?

Ukraine's air defences provided some protection, but the scale of the attack and the resulting disruption highlighted once again the vital strategic importance of Ukraine's energy sector, as well as the ever-present risks to the country's energy supply.
