

Domestic energy storage cost breakdown in Slovakia 2025

How long will a gas storage facility last in Slovakia?

Its construction should last about one year. The current underground gas storage capacity in Slovakia is about 3 billion cubic metres. The existing facilities are operated by companies Nafta and Pozagas. Another locality suitable for construction of a gas storage facility is in Ptruksa in eastern Slovakia.

How much does electricity cost in Slovakia in 2023?

Industrial prices in Slovakia are slightly higher than the EU average (+9% in 2023). Electricity prices for households rose by 13% in 2022 and 4% in 2023 (reaching EUR17.1c/kWh), after increasing by around 3%/year between 2017 and 2020, and decreasing slightly in 2021 (-3%).

When did Slovakia close its last coal-fired power plant?

Slovakia closed its last coal-fired power plant in 2024. Gas and electricity prices for industry skyrocketed by 123% and 83%, respectively, in 2022, before stabilising in 2023. Primary energy intensity to the GDP is decreasing very rapidly (2.8%/year since 2010).

How much oil does Slovakia produce in 2023?

Slovakia produces very limited amounts of crude oil (0.3 Mton 2023), which is used in the petrochemical industry only. Electricity prices for industry skyrocketed by 90% in 2022 and stabilised at EUR23.2c/kWh in 2023. Industrial prices in Slovakia are slightly higher than the EU average (+9% in 2023).

How does sectoral breakdown affect a country's energy needs?

The sectoral breakdown of a country's energy demand, which is based on its economy, geography and history, can greatly impact its energy needs and which energy sources it relies on to meet those needs- such as fueling automobiles, heating or cooling homes or running factories.

How much does electricity cost in 2022 & 2023?

Electricity prices for households rose by 13% in 2022 and 4% in 2023 (reaching EUR17.1c/kWh), after increasing by around 3%/year between 2017 and 2020, and decreasing slightly in 2021 (-3%). At 3.2 toe, total energy consumption per capita is 14% above the EU average; power consumption per capita is 23% lower (4 114 kWh) (2023).

The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions. Therefore, all parameters are the same for the research and development ...

Projected Utility-Scale BESS Costs: Future cost projections for utility-scale BESS are based on a synthesis of cost projections for 4-hour duration systems as described by (Cole and Karmakar, 2023). The share of energy
