

Energy storage installed capacity over the years

How did energy storage perform in Q4 2024?

Residential energy storage had a boom year for growth, deploying 1.25 GW in 2024, a 57% leap above 2023 totals. Residential battery installers had a record quarter in Q4 2024, rising 6% quarter-over-quarter by deploying 380 MW. Community, commercial and industrial storage also grew year-over-year, rising 22% to 145 MW deployed.

Should energy storage be developed?

Developing energy storage has become a global consensus. It was announced at COP29 in late 2024 that global storage capacity will increase to 1,500 GW by 2030, more than six times the 2022 level. As a result, InfoLink maintains a cautiously optimistic outlook for the medium- to long-term development of energy storage systems.

What is the future of energy storage in 2023?

In the first half of 2023, the United States saw significant growth in its utility energy storage capacity and reserves: According to S&P Global's forecast, the new installed capacity of U.S. utility energy storage (battery storage) is projected to reach 3.50 GW in Q3 2023, marking an 81% increase compared to the previous quarter.

How many GW of energy storage installations are there in 2024?

HOUSTON/WASHINGTON, D.C., March 19, 2025 -- The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts (GW) of installations across all segments, according to the latest U.S. Energy Storage Monitor report released today by the American Clean Power Association (ACP) and Wood Mackenzie.

How big is the energy storage capacity in the United States?

According to the EIA, the newly added energy storage capacity with battery sizes exceeding 1 MW in the United States soared to 3.3 GW in the first seven...

How has cost decline impacted energy storage?

This trend may highlight that the cost decline over the past few years has driven energy storage into an era of accelerated diversification in the global market. The European energy storage market added 19.1 GWh of installed capacity in 2024, up 12.4% YoY, with drastic changes in the ESS landscape throughout the year.
