

Energy storage inverter pse certification system

Are non-specified electrical products eligible for PSE certification?

Non-Specified Electrical Products are not required to obtain third-party conformity assessment and are not eligible for PSE Certification, but can obtain voluntary S-JQA certification. Aquarium aerators (e.g. bubblers, air stones, etc...)

Are manufacturers obligated to conduct PSE compliance testing?

Manufacturers are obligated to conduct PSE compliance testing to ensure their products comply with technical requirements. This requirement may be fulfilled by in-house testing and/or third-party testing, as needed. (Article 8, Section 1, Obligation to Comply with Technical Requirements)

What is a PSE Mark for electrical products?

Specified Electrical Products must display the diamond PSE mark. Low-risk products are termed "Non-Specified Electrical Products" and are subject to a self-declaration scheme. Non-Specified Electrical Products must be marked with the circle PSE mark.
