

Energy storage project promotion

How are incentives provided for residential and retail energy storage projects?

Incentives for all residential and retail storage projects are provided through a network of participating contractors approved under the Residential and Retail Energy Storage Incentive program who contract directly with the customer. The program breaks out incentives geographically by sector and region in the Megawatt hour (MWh) Block Dashboards.

Are battery storage projects eligible for energy storage incentives?

The Program Manual [PDF] provides a full list of project eligibility and requirements. For battery storage systems above five MW of AC power, projects could be eligible for incentives through the Bulk Energy Storage Program. Additional details on both the Residential and Retail Energy Storage Incentive are available in the program manual [PDF].

Can energy storage technology be promoted under incentive policies?

In a certain sense, this study reveals the research on the promotion mechanism of energy storage technology under incentive policies and provides a certain reference basis for local governments to formulate and improve energy storage policies.

Are energy storage projects a demonstration project?

In combination with the actual development of energy storage industry, most energy storage projects are demonstration projects at present, and many energy enterprises are still in a wait, so they have little enthusiasm to configure energy storage devices. In this case, it is taken as the example.

How do I apply for a retail energy storage incentive?

Contractors and Builders can apply for this program separately through the NYSERDA Portal. The Retail Energy Storage Incentives are available for new commercial scale distributed (retail) energy storage projects up to 5 megawatts (MW) that are either located behind a customer's electric meter or interconnected directly to the distribution network.

Where can I find information about energy storage incentives?

Incentive details will be available on the Residential Energy Storage Incentive Dashboard and Retail Energy Storage Incentive Dashboard. The Residential Energy Storage Incentives are available for contractors' installing storage on a new or existing home in New York State. Incentives are available for up to 25 kWh of storage capacity.
