

Expected ROI of hybrid solar storage project in Portugal 2025

How much will Portugal spend on energy storage projects in 2025?

From ESS News Portugal's Ministry of Energy has announced that it has allocated EUR100 million (\$104.2 million) to 43 energy storage projects which should be installed by the end of 2025. A total of 79 applications were vying for grant support secured under the country's Recovery and Resilience Plan (RRP).

Why is Portugal launching a solar energy storage project?

This initiative aims to enhance the flexibility and stability of Portugal's power supply system amid its record-breaking solar electricity production. On July 31, the ministry announced the allocation of EUR99.75 million through a call for tenders to install energy storage projects totaling 500 MW.

Is Portugal's second hybrid park combining wind and solar energy?

EDP Renewables, a leading global player in the development of wind and solar projects, has commissioned Portugal's second hybrid park that combines wind and solar energy in the same location, practically doubling the capacity for renewable electricity production in a single site.

What does Portugal's energy policy mean for the energy sector?

The Portuguese Ministry of Energy has allocated EUR100 million for grid flexibility and energy storage projects to be completed by the end of 2025. This initiative aims to enhance the flexibility and stability of Portugal's power supply system amid its record-breaking solar electricity production.

Which solar-plus-storage projects are available for public consultation?

The projects listed for public feedback on the government's consultation portal include two solar-plus-storage sites. Two solar-plus-storage projects are among five planned renewable energy sites whose details have been published for public consultation on the Portuguese Environment Agency's Participa portal.

What percentage of Portugal's energy is renewable?

The share of renewables in Portugal's energy mix has grown from 27% in 2005 to 54% in 2017, with the last coal-fired power plant closing in 2021. As part of its new energy strategy, Portugal aims to produce 80% renewable electricity by 2026 and 85% by 2030.

That's why people who calculate solar power return on investment carefully often find solar to out-return traditional investments in terms of both stability and predictability. ...
