

# Expected ROI of industrial energy storage project in Poland 2025

What does ENEX 2025 tell us about energy storage in Poland?

The insights from Enex 2025 reinforce that BESS is no longer an emerging trend--it's a critical part of Poland's energy transition. With favorable market reforms and growing investment interest, the country is well-positioned to capitalize on energy storage innovations.

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

How will Polish energy sector evolve in 2025?

Innovation in the wind power and energy storage sector is expected to increase in 2025. The "Moja Elektrownia Wiatrowa" program plays an important role in the modernization of the Polish energy sector. It supports the development of energy storage, improves energy efficiency and increases the share of RES in the country's energy mix.

How much will Poland spend on energy infrastructure by 2035?

Recognizing the need for a modernized energy infrastructure, the Polish Power Grid and the government have committed EUR24 billion by 2030 and another EUR19 billion by 2035 to upgrade transmission and distribution networks.

Will energy storage subsidy programs accelerate Poland's energy transition?

The development of energy storage subsidy programs in 2024-2025 has great potential. The planned activities will accelerate Poland's energy transition, supporting the development of technologies and the creation of new jobs in the energy sector. Energy storage subsidy programs are crucial to stabilizing Poland's electricity grid.

Is Poland a key player in Europe's energy storage sector?

Poland is emerging as a significant player in Europe's energy storage sector. The recent capacity market auctions in December 2024 highlighted a substantial shift towards BESS, with approximately 2.5 GW secured by new generation capacity market units, predominantly Li-ion energy storage projects.

In a EUR360 million investment, LG Energy Solution Wroclaw will construct a 900 MWh energy storage facility in Zarnowiec for PGE. The facility, adjacent to the Zarnowiec Pumped Storage Power Plant, will enhance grid stability and ...

The EMMES 9.0 data highlights significant growth in the energy storage sector: increased deployment rates, larger energy storage systems, and a rising trend of co-locating storage projects with renewables. From a policy perspective, new ...

# Expected ROI of industrial energy storage project in Poland 2025

2025 is shaping up to bring continued sustainable growth for the Polish industrial market. Poland is expected to strengthen its position as a rapidly expanding European logistics hub while growing more environmentally conscious and ...
