

# Flow battery system cost breakdown in China 2030

How is the flow battery market changing?

The flow battery market is experiencing significant transformation driven by raw material dynamics and supply chain developments. China maintains its dominant position in the vanadium supply chain, accounting for approximately 66% of global production, which has substantial implications for flow battery manufacturing and pricing.

What is the growth potential of the flow battery market?

This trend underscores the growth potential of the flow battery market, as these technologies become crucial in the flow battery energy storage systems market. The Vanadium Redox Flow Battery (VRFB) segment dominates the global flow battery market, commanding approximately 83% market share in 2024.

How much do commercial flow batteries cost?

Existing commercial flow batteries (all-V, Zn-Br and Zn-Fe (CN) 6 batteries; USD\$> 170(kW h)<sup>-1</sup>) are still far beyond the DoE target (USD\$100 (kW h)<sup>-1</sup>), requiring alternative systems and further improvements for effective market penetration.

Why do flow battery developers need a longer duration system?

Flow battery developers must balance meeting current market needs while trying to develop longer duration systems because most of their income will come from the shorter discharge durations. Currently, adding additional energy capacity just adds to the cost of the system.

Are aqueous flow batteries still competitive?

It can be seen that competitive systems are still realistic from the current status of aqueous flow batteries, while their non-aqueous counterparts remain challenging unless tremendous improvements (e.g. higher current density, wider voltage window) have been made on several aspects.

How long do flow batteries last?

Valuation of Long-Duration Storage: Flow batteries are ideally suited for longer duration (8+hours) applications; however, existing wholesale electricity market rules assign minimal incremental value to longer durations.

Current Year (2021): The 2021 cost breakdown for the 2022 ATB is based on (Ramasamy et al., 2021) and is in 2020\$. Within the ATB Data spreadsheet, costs are separated into energy and power cost estimates, which allows capital ...
