

Garmin 6x pro solar battery life

How long does the Garmin Fenix 6x pro solar battery last?

The battery life compared to many smartwatches is very long on the Garmin Fenix 6X Pro Solar, coming in at 21 days on standby if you don't use the onboard music player or fire up the GPS.

Does the Garmin 6x Pro have solar?

The 6X Pro solar swaps out the steel case of the 6 Pro in favour of titanium, a move that shaves a few grams, but most obviously boosts battery life with a solar array hidden within the Garmin Power Glass.

What is the Garmin Fenix 6x Pro Solar?

The Garmin Fenix 6x Pro Solar is a GPS sports watch with advanced features. It is often compared to a Swiss Army Knife due to its numerous functions, which have evolved with technology.

How many data fields does the Garmin Fenix 6x solar display?

The Garmin Fenix 6x Solar displays up to 6 data fields on-screen during a given activity. You're able to pick these from the menu. Examples include pace and cadence, lap times, and heart rate. Verdict The Fenix 6x Pro Solar isn't unique, but it's certainly refined.

How long does a 6x battery last?

Obviously, the lower-end 6 models have plenty of battery life for most people, but the 6X gives you 30% more juice. They claim 21 days of use straight as just a smartwatch, then we go to 60 hours if you are using GPS for tracking. That drops dramatically to 15 hours if you use GPS and music together.

Does Garmin Fenix 6x pro solar have a heart rate monitor?

One thing we'd advise is getting a chest-based heart rate monitor - some people have reported the inbuilt heart rate monitor of the Garmin Fenix 6X Pro Solar is fine, but we found that the chest strap offered more accuracy and didn't incorrectly tell us that the heart rate was soaring on an easy run, for instance.
