

Garmin instinct 2s solar battery life

How long does a Garmin Instinct 2 solar last?

The Garmin Instinct 2 Solar is a standout option for anyone needing a watch to last for days at a time. With a stated GPS battery life of 30 hours, it packs more than enough battery life for most adventures. The biggest feature of the Instinct 2 Solar's battery life is its ability to charge through the watch face when the sun is out.

Why should you buy a Garmin instinct solar 2s?

Rugged, reliable and uncomplicated. Like all the best things in life. The Garmin Instinct Solar 2S offers exceptional battery life owing to its (as the name might suggest) sneaky built-in solar panels which help boost up your battery whilst you enjoy the great outdoors.

How much does a Garmin Instinct 2 solar cost?

For this review, I tested out the Instinct 2 Solar in the smaller size (40mm). Both the smaller (40mm) and larger (45mm) Garmin Instinct 2S Solar watch will cost you \$449.99/£389.99 at full price. This steadfast watch will see you through any run with its extremely competitive battery life, steadfast build, and handy multi-sport mode.

What's inside a Garmin Instinct 2?

While each Garmin Instinct 2 series unit has a different box, the contents inside of them are all equally the same: Watch, charging cable, paper stuffs. Here, let me demonstrate that. First up, the Garmin Instinct 2 & 2 Solar: And again, with the Instinct 2S Solar too, just more colorful:

Does the instinct 2s solar have unlimited battery life?

The clue is in the name. The Instinct 2S Solar has clever, built-in solar panels on its face that mean that it has an unlimited battery life - with a couple of caveats. According to Garmin, unlimited battery is based on all-day wear in Battery Saver or Smart Watch modes, with at least 3 hours per day outside in 50,000 lux conditions.

How long does the instinct 2s battery last?

The Instinct 2S holds battery life for a long time. I have found that this has been on average around 16 days, and that's with tracking some sort of activity six days a week. Obviously if using some energy sapping apps would negatively affect battery life, but I didn't find they ever reduced it that much.
