

# Gel battery storage project financing options in Ghana 2025

Will Sweden finance a solar energy project in Ghana?

Sweden has previously financed similar international climate projects under the Kyoto Protocol. Less than one percent of Ghana's electricity production comes from solar energy. Sweden is about to finance a project that increases that share - and helps accelerate the transition to a sustainable energy system.

Can Climate Cooperation accelerate the uptake of solar energy in Ghana?

With access to carbon finance through climate cooperation in line with the Paris Agreement, the uptake of solar energy and energy storage in Ghana can be accelerated". The project in Ghana is the first Swedish project that goes through procurement to implementation under the Paris Agreement framework.

Does Ghana have solar energy?

Ghana currently has less than one percent solar energy in its electricity mix. With access to carbon finance through climate cooperation in line with the Paris Agreement, the uptake of solar energy and energy storage in Ghana can be accelerated".

Can Sweden finance a climate project in Ghana?

The project in Ghana is the first Swedish project that goes through procurement to implementation under the Paris Agreement framework. Sweden has previously financed similar international climate projects under the Kyoto Protocol. Less than one percent of Ghana's electricity production comes from solar energy.

Will solar panels reduce CO<sub>2</sub>e in Ghana?

The project will lead to the installation of roof-mounted solar panels with battery storage for commercial and industrial facilities across Ghana. This will displace the use of diesel-powered backup generators and grid electricity, reducing emissions by approximately 165 000 metric tons of CO<sub>2</sub>e by 2030. A similar solar panel project in Ghana.

Why is solar energy so slow in Ghana?

Sandra Lindström continues; "Despite Ghana's sunny climate, the uptake of solar has been slow due to high capital costs and the need for long term investments. Ghana currently has less than one percent solar energy in its electricity mix.

The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions. Therefore, all parameters are the same for the research and development ...
