

# Gigabit energy storage

Who is Giga storage?

GIGA Storage is the energy storage company that develops, realizes and deploys large-scale energy storage projects. What makes our solution so unique is the smart combination of hardware and software! Large-scale energy storage is the missing link in the energy transition.

Why should you choose Giga storage?

Through the energy markets, GIGA Storage is able to take over the balancing role of coal and gas power stations. Our batteries also prevent congestion problems, allowing more private individuals, companies and solar and wind producers to be connected to the grid. GIGA Storage realizes large-scale sustainable energy storage.

Will energy storage hit the Big Time?

By Vijay Vaitheeswaran, Global energy and climate innovation editor, The Economist Energy storage for the electrical grid is about to hit the big time. By the reckoning of the International Energy Agency (iea), a forecaster, grid-scale storage is now the fastest-growing of all the energy technologies.

Can big batteries save energy?

Big batteries attached to the grid, which store energy when it is abundant and release it when it is needed, solve that problem neatly. The iea predicts that in 2025 the combination of solar-photovoltaic generation and battery storage will be cheaper than the cost of coal-fired power in China, and new gas-fired plants in America.

Will energy storage be a big time in 2025?

Energy storage for the electrical grid is about to hit the big time. By the reckoning of the International Energy Agency (iea), a forecaster, grid-scale storage is now the fastest-growing of all the energy technologies. In 2025, some 80 gigawatts (gw) of new grid-scale energy storage will be added globally, an eight-fold increase from 2021.

Why is energy storage so important?

There is a growing need to increase the capacity for storing the energy generated from the burgeoning wind and solar industries for periods when there is less wind and sun. This is driving unprecedented growth in the energy storage sector and many countries have ambitions to participate in the global storage supply chains.
