

Government procurement price of MW scale storage system in Tanzania

How can Tanzania modernize its public procurement system?

Learning from other countries' experience with annual procurement plans, tenders and direct procurement is essential. The examples of these countries could be used and applied in Tanzania. Providing legal guarantees in the PPL and then practical access to machine-readable data on public procurement is necessary if Tanzania desires to modernize its public procurement system.

What is public procurement system in Tanzania?

Public procurement system in Tanzania is decentralized, meaning that all entities covered by the law conduct public procurement activities individually through means available in the country. Centralized procurement is also allowed via the framework agreements.

Who is covered by public procurement law in Tanzania?

It covers any corporate or statutory body or authority established by the government. Public procurement law also covers state-owned companies and local government authorities. Public procurement system in Tanzania is decentralized, meaning that all entities covered by the law conduct public procurement activities individually through means available in the country.

Do procurement systems need access to information in bulk?

For the modernization of the procurement system, access to information in bulk is necessary. Despite the fact that the online portal is still new and requires time to be fully operational, machine-readability of data and public access in such formats should be considered.

What is procurement management information system (PMIS)?

The PPRA is managing the Procurement Management Information System (PMIS). PMIS is a tool to facilitate exchange of information between PPRA and Procuring Entities. PMIS supports the System for Checking and Monitoring of Procurement activities by enabling online submission of Annual Procurement Plans (APP), monthly reports and Checklist forms.

How does PMIS support the system for checking and monitoring of procurement?

PMIS supports the System for Checking and Monitoring of Procurement activities by enabling online submission of Annual Procurement Plans (APP), monthly reports and Checklist forms. However, the information system is only for the use of the procuring entities and not for the general public or the economic operators participating in procurement.
