

# Government procurement price of home energy storage in New Zealand

How much does government procurement cost in New Zealand?

New Zealand's government procurement, valued at roughly \$40 billion NZD annually, opens doors for businesses of all sizes. The centralized platform, Government Electronic Tenders Service (GETS), publishes opportunities and categorizes them as low-value (under \$50,000 NZD), medium-value (\$50,000-\$250,000 NZD), and high-value (over \$250,000 NZD).

Will Rankine power supply increase wholesale electricity prices in New Zealand?

Concept Consulting's modelling shows that without thermal generation from the Rankine units as part of New Zealand's energy storage solution, wholesale electricity prices would likely be 60% higher in the short-term (the next two-to-three years) and 11% higher in the long-term (ten+ years).

Do distributed battery energy storage systems work in New Zealand?

A recent study on distributed battery energy storage systems in New Zealand shows that if such systems are appropriately configured, they can respond faster than current providers of instantaneous reserve, recovering frequency faster and stabilising the system with fewer oscillations (Transpower, 2019a). 49.8 Hz and 50.2 Hz.

Is solar PV a viable option for New Zealand households?

This is the first study in New Zealand to use detailed and high-quality data for both solar supply and residential demand. It shows solar PV is likely to be financially viable for a significant proportion of New Zealand households, particularly for those who consume a lot of energy.

Can home energy storage reduce energy costs?

New research analyses solar generation and demand data across regions under various price pathways, including the role of home energy storage. Residential rooftop solar PV provides a means for consumers to lower their electricity costs, particularly if they choose to move more of their household energy consumption to electricity.

Why is fuel storage important in New Zealand?

The choice of fuel used for storage is critical for security, price stability and environmental impact. There is value in New Zealand having diversity for its storage solutions, as seen by the impact of the lack of gas in Winter 2024. Working with every facet of the energy industry, to help clients respond to business issues and trends.
