

# Government procurement price of hybrid solar storage in Czech

Is there a future for energy storage in the Czech Republic?

Despite the ongoing discussions, there is no significant development in the area of energy storage. In 2015, the Czech Government adopted the National Action Plan for Smart Grids ("NAPSG") prepared by the Ministry of Industry and Trade under principles set out in the update of the State Energy Concept, which was also introduced in 2015.

Are there any large-scale electricity storage projects in the Czech Republic?

There are no other larger-scale electricity storage projects currently being developed in the Czech Republic. However, the Czech government provides subsidies to household projects consisting of photovoltaic panels with electricity storage systems.

What will the Czech electricity storage scheme do in 2025?

In an announcement released on March 7, 2025, the executive arm of the European Union said that the Czech scheme will support the installation of at least 1.5 GWh of new electricity storage facilities. The measure will be open to all storage technologies directly connected to the transmission network or distribution network.

Does the Czech government provide subsidies for electricity storage?

However, the Czech government provides subsidies to household projects consisting of photovoltaic panels with electricity storage systems. Batteries and thermal energy storage are the two most commonly used methods of electricity storage for households in the Czech Republic.

Are pumped hydro storage projects eligible for state subsidies?

Pumped hydro storage projects are not eligible for any state subsidies. The Czech government subsidises the installation of photovoltaic panels located on domestic properties producing energy for their own consumption and the purchase of co-located energy storage solutions.

Is there a legal framework for electricity storage?

As indicated above, there is no specific legal framework for electricity storage, except for the existing pumped hydro storage projects. The study undertaken pursuant to NAPSG will be prepared by the end of 2016. However, no significant development of energy storage projects (save for domestic projects) is expected until the end of 2020.

The Czech Republic, a country known for its rich history and industrial prowess, is steadily emerging as a leader in the solar energy sector. With an increasing focus on sustainability and renewable energy sources, the nation has witnessed ...
