

Government procurement price of hybrid solar storage in Finland

Are high Vres shares possible in the Finnish energy system?

In conclusion, these studies indicate that high VRES shares in the Finnish energy system are possible, but require measures such as energy storage and demand response for their successful integration. 3.

How do EU-funded hydrogen projects work in Finland?

There is a variety of EU-funded financial tools and incentives for hydrogen projects. The affordable low-carbon electricity grid, the high availability of new VRES, and the willingness to pay from local offtakers, are making Finland attractive for European renewable hydrogen projects.

How does the Finnish TSO respond to the growing number of renewable installations?

The Finnish TSO, Fingrid, is continuously taking measures to respond to the fast-growing number of renewable installations. The power system is getting more complicated both from a technical and commercial perspective, with many large changes occurring simultaneously both in electricity production and consumption.
