

Government procurement price of lithium ion storage in Poland

Are subsidies available for energy storage facilities?

Subsidies are available for energy storage facilities, as long as they are integrated with the energy source being implemented as part of the investment. The program provides support covering up to 20% of eligible costs. The continuation of both programs is planned with a larger budget.

How much PLN can a storage facility get subsidized?

The program provides subsidies of up to PLN 17,000 for electricity storage facilities. The minimum storage capacity eligible for support is 2 kWh, with a maximum subsidy of PLN 6,000 per kWh. Such support provides a strong incentive to invest in these technologies.

How will the energy storage industry evolve in 2024-2025?

A rapid increase in the number of energy storage installations is expected in 2024-2025. This will be an important step in modernizing the Polish energy sector and strengthening the position of prosumers in the market.

What is the minimum storage capacity eligible for PLN support?

The minimum storage capacity eligible for support is 2 kWh, with a maximum subsidy of PLN 6,000 per kWh. Such support provides a strong incentive to invest in these technologies. In 2025, the program will continue to support the stabilization of the electricity grid.

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity. While it remains to be seen what the US administration might impose ...
