

Government procurement price of off grid solar storage in Switzerland

How will new solar regulations affect Switzerland's electricity grid?

"The new regulations encourage the temporary storage of solar production peaks, which helps relieve the electricity grids," said Swissolar. Switzerland installed approximately 1.78 GW of new PV capacity in 2024, according to provisional figures from Swissolar.

Who surveys the solar market in Switzerland?

The Swiss Federal Office of Energy has been surveying the solar market in Switzerland for more than 20 years. Due to this long experience, the quality of the data has been maintained, thanks as well to all the installers and distributors who are willing to complete the annual questionnaire.

How are solar energy regulations affecting the electricity grid?

The regulations encourage self-consumption and the storage of solar production peaks to ease pressure on the electricity grid. They also set new remuneration tariffs based on a realistic share of self-consumption, with PV system operators encouraged to expand self-consumption through storage batteries or electromobility.

What is the Swiss Federal Act on a secure electricity supply?

The Swiss Federal Council has adopted a second set of ordinances to implement the Federal Act on a Secure Electricity Supply from Renewable Energy Sources. The new regulations, set to take effect on Jan. 1, 2026, cover energy communities and minimum remuneration.

What are the new solar energy regulations?

The new regulations, set to take effect on Jan. 1, 2026, cover energy communities and minimum remuneration. The regulations encourage self-consumption and the storage of solar production peaks to ease pressure on the electricity grid.

Is there a tendering scheme for PV systems in Switzerland?

There are no tendering schemes for PV systems in Switzerland. There are, however, several auction platforms for selling/buying green certificates (guarantee of origin). The price for those certificates has constantly dropped over the past years. There are no specific utility-scale measures in place in Switzerland.

Published January 2025, this graphic collects together six small maps showing projects under South Africa's battery energy storage IPP procurement (BESIPPP) programme windows, Eskom battery energy storage projects and the 7th bid ...
