

Government procurement price of rooftop solar battery in Croatia

How much does a solar tender cost in Croatia?

The first tender, with a budget of EUR10 million, will be aimed at installing residential solar arrays in the second quarter of 2025 and will cover up to 50% of the investment costs. Additionally, the Croatian authorities will announce a EUR25 million call to co-finance solar plants and heat pumps for the public sector in the second quarter.

How much does solar energy cost in Croatia?

In a related initiative, the Croatian energy market operator HROTE hosted a renewables tender in June 2024 to secure market premium support for 607 MW of renewable energy, which included 450 MW of solar power. The tender ultimately allocated 413.5 MW of solar energy at an average price of \$0.065 per kWh.

How much does a project cost in Croatia?

The Croatian Ministry of Economy and Sustainable Development said the goal is for companies to produce energy for self-consumption, which should bring down energy costs. Companies can secure between EUR100,000 and EUR2 million per project. Developers can apply for multiple projects, with the maximum amount per single applicant capped at EUR4 million.

How much solar power does Croatia have in 2021?

The International Renewable Energy Agency (IRENA) says that Croatia had 309 MW of installed PV capacity at the end of 2021. GlobalData expects the country to reach 770 MW of cumulative solar capacity by 2030. This content is protected by copyright and may not be reused.
