How to estimate battery demand for DoD ground support equipment (GSE) Systems?

It is difficult to estimate the demand of batteries for DoD Ground Support Equipment (GSE) systems. The total number of GSE systems is estimated based on the average battery demand (i.e., 92K) and a battery lifecycle of two years. A preliminary analysis of GSE provides the notional distribution of GSE system types and battery distribution profiles.

Will specialty markets and specialty battery designs continue to be needed?

Specialty markets and specialty battery designs will continue to be needed to meet many DoD missions. DoD standardization investments are structured to target the largest known opportunities, although future standard formats may be needed in the DoD portfolio. Yes, slides are available.

What are the challenges of procurement for utility-side storage & solar-plus projects?

The challenges of procurement for utility-side storage and solar-plus projects center largely on early-stage decisions: defining the top-priority use case, but also exploring ways to get more value out of the project and to prepare for market changes over its life.

How do I get a customized UPS & battery RFP?

You can get your customized UPS & battery RFP and bid list compiled and sent to you automatically via email once you sign up for the daily notification service. Two (2) Year Contract for Maintenance & Repairs of Waterworks Waukesha Diesel Engines & Repairs to Generator for the J.P. Water Dept.

How can the DoD improve battery demand?

DoD can better signal to industry what the likely total demand is across multiple programs in the near term." batteries and cells over the next five to ten years to avoid substantial cost and availability risks for future high-volume battery needs.

Will standardization reduce lithium-ion battery demand in 2022?

Standardization is the near-term opportunity for the DoD to reduce the types of batteries and aggregate battery demand" total lithium-ion market. In 2022, total global lithium-ion battery demand was 642 GWh. Source: Benchmark Minerals Intelligence 2024?
