

Government procurement price of wind solar storage in Serbia

How many MW of solar power does Serbia have?

Serbia only had 29 MW of installed PV capacity at the end of 2020. Following its inaugural renewable energy auction last year, Serbia is preparing to launch a new round of procurement this year as it seeks to allocate premiums for at least 1 GW of wind and 300 MW of solar power.

Is there a registry for solar installed for self-consumption in Serbia?

However, that figure is not exact, as there is no official registry for solar installed for self-consumption at this stage. Last April, Serbia switched on its largest utility-scale solar project, the 9.9 MW Delasol PV project in the Lapovo, central Serbia.

How many solar panels are installed in Serbia?

According to the Association of Renewable Energy Sources of Serbia, the country has installed around 60 MW of solar. However, that figure is not exact, as there is no official registry for solar installed for self-consumption at this stage.

What is Serbia's largest solar project?

Last April, Serbia switched on its largest utility-scale solar project, the 9.9 MW Delasol PV project in the Lapovo, central Serbia. This content is protected by copyright and may not be reused.

How much does a wind project cost?

The procurement exercise attracted 16 project proposals with a combined capacity of 816 MW. The government said last August that the lowest bid for wind projects was EUR0.06448 (\$0.070)/kWh and the lowest offer for PV reached EUR0.08865/kWh. The ceiling prices were EUR0.0105/kWh and EUR0.090/kWh, respectively.
