

Great wall motors energy storage technology

Who is Great Wall Motors?

Join us on this exciting journey as we continue to shape the future of driving through our unwavering dedication to innovation. Great Wall Motors (GWM) is a global leader in intelligent technology, excelling in automobile and parts design, R&D, production, sales, and service. GWM's renowned brands include HAVAL, WEY, ORA, TANK, and GWM Pickup.

What is GWM intelligent new energy?

GWM also conducted a simultaneous online live broadcast, which attracted numerous users. During the event, GWM President Mu Feng presented the company's new brand declaration "GWM Intelligent New Energy--more efficiency, more range and more safety." He stated that "GWM has always been adhering to an intelligent new energy strategy.

What does GWM do?

In the field of distributed energy storage, GWM has comprehensively laid out the upstream and downstream of the industry chain, covering core areas such as mineral resources, battery materials, energy storage systems, and battery recycling.

What will GWM do in the future?

GWM will continue to deepen its new energy and intelligent strategic transformation and inject new energy and intelligent technology into more vehicle models. The company aims to create a more diversified new energy product structure, providing global users with more high-quality choices.

What makes GWM unique?

In the field of hydrogen energy, GWM has independently developed the core components of the hydrogen energy system, making it the only domestic vehicle company with a core technology layout in the entire hydrogen energy industry chain.

When will GWM introduce electric four-wheel-drive technology?

GWM plans to launch the first model with this hybrid technology in April this year. By 2024, GWM's entire new energy product line will be equipped with electric four-wheel-drive technology, providing users with a more powerful and environmentally friendly driving experience.
