

When will energy storage facilities be built in Israel?

(3) The Electricity Authority will publish a tender in September 2023 for the establishment of Energy Storage facilities with a total capacity of 900MW. Israel plans to use its abundant gas resources to leverage the development of a gas-based auxiliary industrial sector.

How much solar power does Israel need?

To reach this new goal, Israel will need to increase its overall installed capacity from solar systems to 17.1 GW (almost 3.5 times of its capacity in 2022- 4.7 GW). It will also need to increase overall storage capacity by 10 times from 300 MW in 2020 to approximately 3,000 MW in 2030.

How much solar power will Israel have in 2022?

According to this plan, solar will account for approximately 90% of the electricity, and wind, water and biomass will provide the remaining 10%. To reach this new goal, Israel will need to increase its overall installed capacity from solar systems to 17.1 GW (almost 3.5 times of its capacity in 2022- 4.7 GW).

How does Israel respond to electricity consumption forecasts?

In light of these challenges, the Government of Israel is promoting several programs to respond to electricity consumption forecasts, while reducing pollution and increasing the use of natural gas and renewable energy.

How much electricity does Israel use per capita?

Israel's consumption per capita is 2.5 toe (i.e., 20% less than the Middle East average), including around 6,500 kWh of electricity (65% above the regional average) (2023). Primary energy consumption has remained almost stable since 2021 (around 24 Mtoe), after rising from 2019 to 2021 (2.2%/year).

How much power will Israel have in 2021?

Overall installed capacity in 2021 totaled 21.5 GW, with parastatal company Israel Electric Corporation (IEC) accounting for 61% of production, with independent power producers accounting for the remainder. According to the Electricity Authority, installed capacity in 2025 should reach 27.9 GW to meet the electricity consumption forecasts.
