How much does a Tesla Solar Roof cost?

The cost of a Tesla Solar Roof can be prohibitive, depending on the size of your roof, how much power your home needs and the condition of your current roof. Installing a 12.57 kW Tesla Solar Roof costs an average of \$154,000, including roof replacements costs and two Tesla Powerwalls. This is the price before incentives.  
TOTAL EST. COST

How much electricity does a solar roof produce?

A Tesla Solar Roof produces 5 kW to 23 kW or more of electricity, depending on the roof size, system size, sun exposure, and weather. Each active solar shingle has a maximum output of 71.67 watts. How long does it take to install a solar roof?

Is a Tesla roof worth it?

Because of the Solar Roof's high price and design, a Tesla roof isn't worth it for most homeowners who want to go solar. Even Tesla CEO Elon Musk said Tesla's solar shingles are " a premium product " in the company's 2024 Q4 earnings call.

How much does it cost to install Tesla Solar shingles?

Here are some things that have the most significant impact on the cost of installing Tesla solar shingles: A Tesla Solar Roof installation costs about \$16 per watt of solar installed, whereas traditional solar panels cost about \$3.03 per watt. Let's examine some differences between the Tesla Solar Roof and a conventional solar installation.

How much does a solar roof cost?

Solar panel installation costs \$12,000 to \$33,000 before tax credits or incentives. Traditional solar panels from Tesla and other manufacturers cost less than a solar roof system but are more efficient and produce more wattage. \*Including roof replacement. Other solar roofs cost \$21 to \$40 per square foot installed from brands including:

Is a Tesla Solar Roof a good investment?

The Tesla Solar Roof is not a worthwhile financial investment. The savings generated by the Solar Roof won't recover the installation cost, and in almost every scenario, installing solar panels and getting a conventional roof replacement is cheaper.

Your solar inverter makes the power generated by your rooftop solar system (direct current) useable for your home (alternating current). Inverter selection is calculated using equipment ratings, solar panel orientation, stringing and ...
