

How to change a seiko solar watch battery

What should I do if my Seiko Watch is not a solar watch?

Before continuing, make sure your watch is not a solar watch. If it is, we recommend delegating to the experts for Seiko solar watch battery replacement. This rechargeable battery is actually a special cell called a capacitor, which should be replaced by a trained watchmaker.

Can I replace the battery on my Seiko Watch?

You can replace the battery on your Seiko Watch yourself. It is not a complex process and you can do it with just a few tools. Alternatively, you can take it to a watch shop and get a professional to change the battery for you.

How long can a Seiko solar watch last?

Reliability is the best output from a Seiko solar watch. You can use this solar watch effortlessly for at least 8-10 years without battery replacement. This is because the battery used in the watch is constantly changing by absorbing light.

How often do Seiko solar watches need a battery replacement?

Despite being a good watch, Seiko solar watches need a battery replacement after a decade of use to ensure their operating performance.

How to recharge a Seiko solar watch?

To recharge a Seiko solar watch, it is necessary to expose it to light. Since room light is weaker compared to sunlight, it takes a longer time to recharge the watch. Therefore, when recharging, please place the watch by a window and expose the dial to the sun.

What size battery does a Seiko Watch need?

Seiko watches typically use batteries of size 371 or 303/357. At our repair center, we stock all Seiko battery sizes, including these. However, the solar watch battery usually does not require replacement.
