

# How to view energy storage parameters

What is the energy storage operators' Forum guide?

This report is based on individual project outputs exchanged within the Energy Storage Operators' Forum in the United Kingdom. The Guide is designed as a reference document, with chapters relating to each stage of the project life cycle (e.g., procurement, installation, safety assessment, business case development).

Can a stationary energy storage system adapt to other energy storage systems?

In regions where there is an absence of extensive or relevant protocols for stationary energy storage systems, there may be the ability to adapt or expand on protocols for other energy storage systems that are available.

What is the electrical energy storage guide?

The Guide is designed as a reference document, with chapters relating to each stage of the project life cycle (e.g., procurement, installation, safety assessment, business case development). It also introduces various electrical energy storage technologies and the ways in which they can be used.

Where can I find performance and testing protocols for stationary energy storage systems?

The United States has several sources for performance and testing protocols on stationary energy storage systems. This research focuses on the protocols established by National Labs (Sandia National Laboratories and PNNL being two key labs in this area) and the Institute of Electrical and Electronics Engineers (IEEE).

What types of energy storage are included?

Other storage includes compressed air energy storage, flywheel and thermal storage. Hydrogen electrolyzers are not included. Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

What are some useful reports about energy storage testing?

Below is a non-exhaustive list of valuable reports that the working group has relied on when becoming familiar with storage testing. "Electric energy storage - future storage demand" by International Energy Agency (IEA) Annex ECES 26, 2015, C. Doetsch, B. Droste-Franke, G. Mulder, Y. Scholz, M. Perrin.
