

When will a hybrid Park be fully operational in Sweden?

The hybrid park is expected to be fully operational during 2026. In addition to contributing to Sweden's renewable energy supply and supporting long-term energy security, the project will also generate local value through the involvement of regional contractors for preparatory works.

Will Axpo build a lithium-ion based energy storage facility in Sweden?

Axpo will build a lithium-ion based 20MW/20MWh energy storage facility in Sweden to deliver services to the grid in 2024. Axpo will build a 20MW/20MWh lithium-ion based battery storage facility in the south of Sweden, which will become operational in 2024. The project was developed by RES and SCR and acquired by Axpo on 9 March 2023.

Is TES a good alternative to hydrogen storage?

Since TES and HP are already part of the Swedish energy system, enhancing PtH coupled with TES is a better alternative than installing electrolyzers and hydrogen storage in an energy system without considerable hydrogen demand.

Why is the demand for electricity higher than swe\_2045?

The demand for electricity is significantly higher compared to SWE\_2045, mainly due to increased electrification in the transport and industrial sectors, as well as the demand for electrolytic hydrogen production. Nuclear energy is still part of the electricity supply mix, although production levels are lower than those in 2019. 3.

Can hydrogen storage improve wind integration?

Hydrogen storage can enhance wind integration by 6-9% but does not reduce total annual fuel. Sweden plans to decarbonize its energy sector by 2045 through initiatives such as electrification of transport & industry, wind power expansion, HYBRIT and increased use of biomass. Hitherto studies have predominantly focused on electricity sector.

How many GW CAN a swe\_2045 system integrate?

For example, in scenario SWE\_2045, adding 1000 MW-e of HP and 50 GWh of TES increases wind integration to 10.7 GW, while a system with 4000 MW-e, 42 GWh of TES, and an additional 50 GWh HS only accommodates integration of 10.6 GW.

Sungrow remains committed to innovations that maximize renewable deployment and grid resilience. "A Blueprint for Sweden's Green Future As Sweden advances toward its 2045 net-zero target, the Halmstad hybrid solar park demonstrates ...
