

# Hybrid solar storage tender price in Chile 2026

When will energy storage systems be operational in Chile?

He said that the goal is to tender these storage systems by 2024 and have them operational by the end of 2026. The planned energy storage projects will be located in various sites in northern Chile, where most solar and renewable energy power plants are situated, requiring a total investment of \$2 billion.

Is Chile preparing a tender mechanism for large-scale energy storage facilities?

The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities. The measure aims to maximize the use of renewable energy generated in the northern part of the country.

Does Sonnedix have a solar project in Chile?

Independent power producer (IPP) Sonnedix revealed it was awarded 39% of the total supply, representing 903GWh/year, that will allow it to build around 424MW solar PV projects and invest US\$300 million. The company has previously expanded its position in Chile's solar sector through a host of project acquisitions.

Will Chile get 2GW of renewables by 2025?

Recent developments in Chile's solar sector have seen developer Mainstream Renewable Power unveil plans for a 1GW renewables platform, while French utility Engie is aiming to develop 2GW of renewables in the country by 2025 as part of efforts of a transition away from coal generation.
