Which companies are developing a hydrogen storage system?

The Belgian division of Canadian-based Hydrogenics will supply electrolyser and fuel cell technology, while McPhy Energy in France will contribute its innovative solid-state magnesium hydride technology for hydrogen storage.

Which projects have a battery energy storage system been implemented?

Internationally, we have already implemented major projects such as the Tynemouth stand-alone storage system in the UK and the La Caba; a photovoltaic plant in Chile, which is equipped with a Battery Energy Storage System that ensures its efficiency and stability.

What is Enel doing in Italy?

Enel is leading this revolution with advanced projects both nationally and internationally, thereby contributing to Grid stabilization and decarbonization. Since the 1980s, Italy has shown a constant propensity to innovate in the field of "classic" renewables, with the use of hydropower and pumped storage systems.

How much money does the ICT project cost in Italy?

The four-year project has an overall budget of EUR23.9 million (US\$30 million), including EUR13.8 million (\$17 million) of funding from the European Commission's Seventh Framework Programme. The project is being coordinated by Engineering Ingegneria Informatica, the largest privately owned Italian ICT provider.
