

Italian energy storage electricity price subsidy

Will Italy support a centralised electricity storage system?

The European Commission has approved, under EU State aid rules a EUR17.7 billion Italian scheme to support the construction and operation of a centralised electricity storage system.

Does Italy need electricity storage?

As Italy's energy mix is increasingly composed of variable renewable energy sources, electricity storage will be needed to integrate power generated by renewables into the national grid and make it available when sun and wind energy are not accessible.

How will Italy develop utility-scale electricity storage facilities?

To develop utility-scale electricity storage facilities, the Italian Government set up a scheme that was approved by the European Commission at the end of 2023. Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years.

Is Italy a good country for energy subsidies?

Italy has made progress in reporting and analysing energy subsidies, and has become a leader in terms of transparency on energy subsidies (EC, 2020a).¹² The fourth and latest edition of the "Catalogue of Environmentally Damaging Subsidies and Environmentally Advantageous Subsidies" was released in early 2022.

Does Italy provide fossil fuel subsidies?

However, Italy remains among the main providers of fossil fuel subsidies in the European Union. The fourth and latest survey of subsidies conducted by the MiTE (released in early 2022) identifies environmentally harmful subsidies in the energy sector totalling EUR 9.5 billion in 2020.

How will EU energy policy affect Italy's electricity system?

EU energy policy and international developments will have implications for Italy's electricity system. Both call for an acceleration of the transition towards renewable sources of electricity generation.
