What role does energy storage technology play in Japan's Energy Future?

Given the fundamental direction of Japan's energy landscape, energy storage technology is set to play an integral part in Japan's energy future due to energy storage technology's role in both smart grid technology and in renewable energy's integration into Japan's energy landscape.

How big is Japan's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030. Listed below are the five largest energy storage projects by capacity in Japan, according to GlobalData's power database.

What is Japan's energy storage landscape?

Japan's energy storage landscape is widely distributed across the whole of Japan, geographically-speaking. Furthermore, Japan's energy-storage landscape is characterized by its connection with Japan's smart-grid and smart city landscape. a. Interactive Map of Japan's Energy Storage Landscape

Does Japan have energy storage sites?

The interactive map includes GPS coordinates for Japan's primary energy storage sites, as well as capacity, launch year, primary operator/owner, and a brief description of the site. One immediately apparent trend demonstrated by the interactive map is the distribution of Japan's energy storage sites.

Does Japan have a large-scale energy storage infrastructure?

Figure 16, is a snapshot of the interactive map of Japan's large-scale energy storage geography, as well as its smart-grid and smart-city landscape. Overall, the map demonstrates that Japan has a visible overlap between its smart-grid infrastructure and the country's energy storage sites.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.
