

Who has power in Kyrgyzstan?

Executive power in Kyrgyzstan lies with the government, its subordinate ministries, state committees, administrative agencies and local administrations. In the energy sector, the government: Grants and transfers property rights, and rights for use of water, minerals and other energy resources.

How has Kyrgyzstan improved energy statistics data collection?

Kyrgyzstan has achieved great progress in strengthening energy statistics data collection through the INOGATE programme: the National Statistical Committee has submitted joint annual questionnaires to the IEA since 2014, and for 2015 the breakdown of natural gas consumption by sector had improved.

What is Kyrgyzstan's energy saving potential?

Kyrgyzstan's energy saving potential is significant: it is estimated that rehabilitation and modernisation can save up to 25% of electricity and 15% of heat.

How much energy does Kyrgyzstan produce?

Kyrgyzstan's total primary energy supply (TPES) was 3.9 million tonnes of oil equivalent (Mtoe) in 2015 and reached 4.6 Mtoe in 2018. Total final consumption (TFC) totalled 4.2 Mtoe in 2018, and is growing rapidly (+72% since 2008). In 2018, domestic energy production was 2.3 Mtoe, consisting mostly of hydropower (53%) and coal production (37%).

How do I export data from Kyrgyzstan?

Data is now available through the .Stat Data Explorer, which also allows users to export data in Excel and CSV formats. Kyrgyzstan's oil and gas resources are marginal, but those of coal are substantial.

Why is energy important in Kyrgyz Republic?

In the Kyrgyz Republic, energy is also a source of revenue, when electricity is generated in sufficient quantities to be exported, thereby helping to diversify the economy and open new markets. Today, however, the country is not making the most of its endowments and its energy potential in the form of hydro resources or renewable energy.
