

Large scale battery storage cost breakdown in Australia 2025

How much is battery storage worth in Australia?

Credit: Phonlamai Photo /Shutterstock. The first quarter (Q1) of 2025 has seen a surge in investment for large-scale battery storage in Australia, with six projects worth a total of A\$2.4bn (\$1.5bn) reaching the financial commitment stage, according to the latest Clean Energy Australia Report 2025.

How many battery storage projects are being built in Q1 2025?

Stay proactive with real-time data and expert analysis. Moreover, three more battery storage projects began construction in Q1 2025, adding 840MW/2.9GWh in capacity and energy output.

Are battery energy storage system capital costs improving in 2024-25?

Image: Fluence. A new report published by Australia's Commonwealth Scientific and Industrial Research Organisation (CSIRO) has found that large-scale battery energy storage system (BESS) capital costs have improved the most in 2024-25, falling by 20% year-on-year (YoY).

How big will Australia's battery market be in 2035?

Uptake of utility-scale batteries in Australia could expand eightfold to 18GW in 2035 from 2.3 gigawatts in 2024, according to a new report published by research provider BloombergNEF (BNEF).

Why are large-scale battery and storage projects gaining momentum?

Clean Energy Council Chief Policy and Impact Officer, Arron Wood, said it was encouraging to see sustained momentum in investment for large-scale battery and storage projects given they are critical to achieving reliable and affordable energy generation through renewables such as wind and solar.

Which country has the largest battery energy storage system?

* This question is required. According to the report, the largest battery energy storage system (BESS) project to reach financial commitment in Q1 was in Wooreen, Victoria, boasting a storage capacity of 350MW and an energy output of 1.4GWh. South Australia led in terms of capacity, with projects totalling 640MW/1.8GWh.

Current Year (2021): The 2021 cost breakdown for the 2022 ATB is based on (Ramasamy et al., 2021) and is in 2020\$. Within the ATB Data spreadsheet, costs are separated into energy and power cost estimates, which allows capital ...

Though the battery pack is a significant cost portion, it is a minority of the cost of the battery system. The costs for a 4-hour utility-scale stand-alone battery are detailed in Figure 3. Figure 3. Cost details for utility-scale storage (4-hour ...

Despite these pressures, large-scale solar PV and onshore wind - with integration costs for storage,

Large scale battery storage cost breakdown in Australia 2025

transmission and firming included - continue to offer the lowest levelised cost of electricity (LCOE) across all new-build ...

Large scale battery storage cost breakdown in Australia 2025
