

Large-scale liquid flow energy storage power station approved project

What is Dalian flow battery power station?

The Dalian Flow Battery Power Station project was approved by the Chinese Energy Administration in 2016. This is the first national, large-scale, chemical energy storage demonstration project approved so far. It will eventually produce 200 megawatts (MW)/800 megawatt-hour (MWh) of electricity.

What is China's first large-scale chemical energy storage demonstration project?

The project is the first national large-scale chemical energy storage demonstration project approved by the National Energy Administration of China, with a total construction scale of 200MW/800MWh. The grid connection is the first phase project of the power station, with a scale of 100MW/400MWh.

Why should you choose a lithium phosphate energy storage station?

The energy storage station adopts safe, reliable lithium iron phosphate battery cells for energy storage with great consistency, high conversion rate and long cycle life, as well as a non-walk-in liquid-cooled containerized energy storage system.

Who makes Dalian constant current energy storage power station?

The power station is constructed and operated by Dalian Constant Current Energy Storage Power Station Co., Ltd. and the battery system is designed and manufactured by Dalian Rongke Energy Storage Technology Development Co., Ltd.
