Why are thermal power plants important in Liberia?

Thermal power plants have been important to Liberia's electricity generation infrastructure. These plants utilize heavy fuel oil (HFO), diesel, or other liquid fuels as their primary energy source to produce electricity. The reliance on imported fuels for thermal power generation poses several challenges for Liberia [6,17].

How can Liberia improve energy security?

One strategy is to diversify the energy mix by increasing the share of domestic renewable energy sources, such as solar and wind power, for electricity generation. By harnessing these indigenous and sustainable energy resources, Liberia can decrease its reliance on imported fuels and enhance its energy security.

Will Liberia get a 20 MW power supply in 2020?

In addition, the government signed a Power Purchase Agreement with a solar energy company to provide the country ≥ 20 MW of electricity in 2020. Despite these efforts, much work remains to be done to improve access to reliable and affordable energy in Liberia.

How does Liberia use petroleum products?

Petroleum products, including gasoline and diesel, contribute a significant portion to Liberia's energy consumption. These fuels are primarily used in transportation, power generation from small diesel and gasoline generators and industrial applications. Liberia is a net importer of petroleum products, relying on imports to meet its energy needs.

How can Liberia reduce its dependency on imported fuels?

To overcome these challenges, Liberia has been exploring alternative solutions to reduce its dependency on imported fuels for thermal power generation. One strategy is to diversify the energy mix by increasing the share of domestic renewable energy sources, such as solar and wind power, for electricity generation.

How can Liberia achieve viable energy solutions?

Viable energy solutions. By implementing the PIP for generation, establishing a comprehensive power system master plan, and fostering a clear regulatory framework, Liberia can attract both public- and private-sector investments and ensure a sustainable, affordable power supply.
