

# Lithium ion storage project financing options in Indonesia 2025

Can Indonesia capitalize on growing demand for lithium-ion batteries and EVs?

Indonesia can capitalize on rapidly growing demand for lithium-ion batteries and EVs domestically and globally. 35 million battery electric two-wheelers and 1.5 million battery EV cars.

When will a lithium-ion battery plant be open in Indonesia?

Handout /PRESIDENTIAL PALACE/AFP JAKARTA: A lithium-ion battery plant by an Indonesian company and China's CATL is expected to be in operation by the end of 2026 with initial capacity of 6.9 gigawatt hours, an Indonesian official said on Sunday.

Could energy storage be the future of Indonesia's energy transition?

With variable renewable energy generation, such as solar PV and wind, set to take centre stage in the country's energy transition, energy storage will complement this. This potential has seen several prospective manufacturing facilities proposed in Indonesia.

Will Rept battero invest in Indonesian battery factory?

Rept Battero's non-wholly-owned subsidiary, PT Rept Battero Indonesia, will invest in and construct the Indonesian Battery Factory. The total investment cost was not disclosed, but its shareholders confirmed that a joint total of US\$139.5 million will be invested in the regional subsidiary.

Why is Indonesia becoming a battery manufacturing destination?

Indonesia's emergence as a battery manufacturing destination is primarily driven by its remarkable mineral wealth, particularly its nickel reserves which account for approximately 21% of global supply.

Will lithium-ion batteries be a decarbonized future?

The growing importance of lithium-ion batteries for a decarbonized future emphasizes the need for critical battery materials and robust supply chains. Nickel-based lithium-ion batteries make up more than half of global demand, which is expected to grow by 20% annually (ADB 2023).

Published on April 30, 2025 by Shakun Singh Introduction The lithium market has experienced significant price volatility in the recent past because of fluctuations in supply and demand. The price of lithium carbonate, used primarily in energy ...

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity. While it remains to be seen what the US administration might impose ...
