Is Luxembourg a space power?

Luxembourg first emerged as a potential space power five years ago. In February 2016, the Grand Duchy launched its Space Resources programme, a project to prepare for the future use of extraterrestrial minerals, water and gases to provide energy and materials for human activities beyond Earth.

How much does energy cost in Luxembourg?

Despite the small number of energy suppliers in Luxembourg (compared with other countries), there are significant price differences between the contracts on offer. The difference in price can be as much as EUR120 a year for a single person.

Can wind energy be used in Luxembourg?

Incorporating nuclear into Luxembourg's energy mix could address both reliability and sustainability. Additionally, countries like Denmark and Iowa have demonstrated that wind energy can achieve a significant share--more than half of their production--illustrating the potential of wind energy to diversify Luxembourg's low-carbon sources.
