

MW scale storage system project financing options in Azerbaijan 2030

When will a 50 MW energy storage facility be operational?

During the project's first phase, a 50 MW energy storage facility is expected to be operational by the end of this year or early next year. It's worth recalling that in early May 2024, Azerbaijan's Ministry of Energy signed an implementation agreement with Saudi Arabia's ACWA Power for the development of a 200 MW energy storage system.

Is China a key partner in Azerbaijan's adoption of battery energy storage systems?

China is poised to become a key partner in Azerbaijan's adoption of Battery Energy Storage Systems (BESS) and other advanced energy technologies. During COP29, Azerbaijan's Ministry of Energy signed a Memorandum of Understanding with China Southern Power Grid International (Hong Kong) Co., Ltd and Powerchina Huadong Engineering Corporation Limited.

When will a 250 MW battery energy storage system be operational?

In September of this year, Azerenergy announced a new tender for the development of a 250 MW Battery Energy Storage System (BESS) project, slated for completion by 2027. During the project's first phase, a 50 MW energy storage facility is expected to be operational by the end of this year or early next year.

Will Azerbaijan participate in the great energy transition 2030?

In recent years, Azerbaijan has intensified its efforts to participate in the global "Great Energy Transition 2030," achieving significant progress in developing its green energy sector.

The Ministry of Energy estimates that to successfully integrate 2 GW of "green" energy, Azerbaijan requires a storage capacity of 250 MW. The project is slated for completion by 2027, with an initial 50 MW energy storage ...
