

# MW scale storage system project financing options in Netherlands 2025

Will the Netherlands support battery storage in solar PV projects?

Netherlands recently announced EUR100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.

What is the biggest Bess project in the Netherlands?

As the largest BESS in the Netherlands and one of the largest energy storage projects in Europe, it sets a new standard for balancing and securing power grids. Mufasa is the largest utility-scale battery storage project in the Netherlands to be fully funded through 100% non-recourse project financing of over EUR 350 million. The closing of Project

Is Mufasa the largest battery energy storage system in Europe?

Dutch energy storage developer Lion Storage, part of Return, announces that project Mufasa--one of the largest battery energy storage systems (BESS) in the Europe--has successfully reached Financial Close. extensive experience financing energy transition projects.

Is Mufasa a game changer in battery storage in the Netherlands?

Arno Hendriks, co-founder of Lion Storage, commented, "Project Mufasa is a game changer in battery storage in the Netherlands. As the first project to secure full project funding, it proves that energy storage is not only feasible, but also offers an attractive investment opportunity."

How much does a 'Mufasa' project cost?

The EUR350 million (\$367 million), 350 MW/1.4 GWh Project Mufasa, at the coastal city of Vlissingen in the southwest Netherlands, will feature 372 of Tesla's MegaPack 2 XL battery systems, with the US-based company also providing EPC services for the site.

What is a EUR300m project financing package?

The EUR300m project financing package, which attracted strong interest, has been arranged as a "club deal" with a group of 8 European lenders. The Leopard project is ideally located in Delfzijl, Groningen, close to one of the main offshore wind farm production hubs in the Netherlands.

This inverse behavior is observed for all energy storage technologies and highlights the importance of distinguishing the two types of battery capacity when discussing the cost of energy storage. Figure 1. 2022 U.S. utility-scale LIB ...

On March 3, 2025, the developer's Blackhillock BESS near Inverness was recently switched on at 200 MW/400 MWh capacity, and is expected to expand to 300 MW/600 MWh later in the year. It is the world's
