

# MW scale storage system supplier quotation in Oman 2025

Will Oman have a solar energy storage system?

Additionally, PDO is finalizing plans for a 100 MW solar PV-based IPP, named the 'North Solar Storage IPP,' set to include Oman's first battery energy storage system (BESS). This BESS, using lithium-ion battery technology, will store electrical energy and supply a maximum of 100 MW peak power to PDO's grid during daylight hours.

Will Oman launch a 100 MW solar PV plant in 2025?

In 2025, Petroleum Development Oman is expected to launch the 100 MW North Solar Storage PV plant, featuring the country's first lithium-ion battery system to ensure energy transmission beyond daylight hours with a 100 MW peak capacity.

How much will Oman's power sector invest in the next six years?

Taken together with parallel plans for the implementation of a raft of Wind IPPs and combined cycle gas turbine (CCGT) power projects, total investment in Oman's power sector is set to balloon to well over \$5 billion over the next six years through to 2030.

1) Total battery energy storage project costs average \$580k/MW. 68% of battery project costs range between \$400k/MW and \$700k/MW. When exclusively considering two-hour sites the median of battery project costs are \$650k/MW.

Figure 2. 2022 U.S. utility-scale LIB storage costs for durations of 2-10 hours (60 MW DC) in \$/kW Scenario Descriptions Battery cost and performance projections in the 2023 ATB are based on a literature review of 14 sources published in ...
