

# MW scale storage system tender price in Portugal 2030

What does Portugal's energy storage tender mean for the energy transition?

Portugal's government has announced the outcome of an energy storage tender that will see the installation of 500 MW of energy storage capacity to support the country's energy transition. Energy storage battery. Photo by Anna Vasileva

How much does Portugal pay for energy storage projects?

With this in mind, the Portuguese Ministry of Energy announced on July 31 that it was awarding EUR99.75 million to a call for tenders for the installation of energy storage projects totalling 500 MW. Eligible projects can receive up to EUR30 million and be implemented at the transport and distribution level by the end of 2025.

How many projects were selected in Portugal's 2025 energy storage procurement?

A total of 43 projects were selected from 79 applications in Portugal's 2025 energy storage procurement. This included six projects from Spain's Iberdrola, which secured nearly EUR 20 million in public funding.

What is the EnergyPLAN model for Portugal in 2030?

Results of the ENERGYPLAN model for Portugal in 2030 in the SP scenario. The emissions for all scenarios are close to zero (well below the target of target 4.3Mton), as the natural gas-fired plant is only used for a very few hours of the year. The cost of the system is, at worst, lower than 2023. 6.

How much energy will Portugal produce in 2030?

According to the NECP (which also includes the mainland and islands), the power generation sector is expected to reduce emissions by 83 % in 2030 compared to 2005, so the value considered for 2030 should be 4.34 Mton. As this study considers only the values of mainland Portugal, the value to be achieved should be lower.

Can a gradient-boosting algorithm predict electricity prices for 2030?

The research proposes a new methodological approach by performing EnergyPLAN simulations for the year 2030 for Portugal and Spain, coupled with a gradient-boosting algorithm to forecast the electricity market prices for 2030.

In a significant development for India's renewable energy sector, a solar project integrated with energy storage has recorded a tariff of INR3.32 per unit--5.8 per cent lower than the rate discovered in a similar tender by SECI in ...
