

Microgrid storage project financing options in Malaysia 2026

How do we support Malaysia's Energy Transition?

We support Malaysia's energy transition by financing initiatives in renewable energy, green technology, carbon capture, energy efficiency, green hydrogen, electric mobility, and transition financing. Through our financing solutions, we contribute to the National Energy Transition Roadmap (NETR) and the country's shift towards sustainable energy.

What is a microgrid & how does it work?

Microgrids provide independent and resilient power supply when there is no power grid or the power grid goes out. * THDu <1.5% with linear loads in off-grid mode. Our microgrid solutions are designed to provide reliable, secure, and sustainable power to remote or off-grid communities, industrial sites, and other critical facilities.

What is MGFT's green financing plan?

After a six months' study on green financing, the MGFT submitted its recommendation containing 21 action items under eight broad strategies to facilitate an estimated RM33 billion in renewable energy financing required to meet the 20 percent national renewable energy target installed capacity by 2025.

Does Bank Pembangunan offer financing?

The final rate for the approved financing is subject to Bank Pembangunan's discretion. Bank Pembangunan offers financing starting at RM20 million. If your financing needs are below this amount, you may consider alternative options available here. To learn more about import and export financing, [click here](#).
