

Monrovia energy storage capacity lease price policy

What is Virginia's energy storage goal?

Virginia's target was enacted by law in 2020, which set a 3,100 MW energy storage goal by 2035. A law enacted in 2021 directed the Illinois Commerce Commission to establish storage procurement targets for all utilities serving more than 200,000 customers to achieve by 2032.

When must all the energy storage capacity be operational?

All of the capacity must be operational by 2024. In 2013, the California Public Utility Commission (CPUC) implemented Assembly Bill 2514 by setting a mandate for its investor-owned utilities to procure 1,325 MW of energy storage across the transmission, distribution, and customer levels by 2020.

How much is designated for residential storage systems under 10 kW?

The Self-Generation Incentive Program has designated \$48.5 million in rebates for residential storage systems 10 kW or smaller.

Who owns most of the battery storage installations in ERCOT?

Most (94%) of the installations in the Electric Reliability Council of Texas (ERCOT), which is regulated by the Public Utility Commission of Texas, are owned by IPPs. Although there are relatively fewer large-scale battery storage installations outside of PJM and CAISO, some noteworthy points emerge in other regions.
