

Moonrays solar batteries

Can Moonray charge a 12V battery with a single solar panel?

MoonRay features an optimized MPPT algorithm for a lower solar panel voltage. It is also adapted for a solar panel V_{mp} in the range of 17 to 25 Volts. This to charge a 12V battery with a single solar panel or likewise many solar panels. (remember that parallel is the best solar panel installation on a yacht/motorhome)

Does Moonrays offer a warranty?

Moonrays offers a standard one-year warranty on most of its solar lighting products. For detailed information, consult your product manual or reach out to Moonrays Customer Support. **HOW DO I REPLACE THE BATTERY IN MY SOLAR LIGHT?** Replacing the battery is generally straightforward.

Is a Moonray a good solar panel?

The MoonRay is a high performer even if with a non-optimized random size on the solar panel (s). In other words, choose your solar panel size/watt without limitation. The MoonRay will harvest more during the natural power fluctuations up and down. And is not limited to perfect angles and solar irradiation.

How long does a Moonray solar panel take to charge?

Allow the solar panel to charge in direct sunlight for at least 6-8 hours. For more specific instructions related to your model, consult the product manual. If you encounter issues, you may also reach out to Moonrays Customer Support for further assistance. **HOW DO I TURN ON MY CRACKLE BALL PATHWAY LIGHT?**
