

NMC battery storage project financing options in Sweden 2026

How many large-scale battery storage facilities are there in Sweden?

This initiative represents the deployment of 14 large-scale battery storage facilities with a total capacity of 211 MW/211 MWh - a historic investment and milestone in Sweden's transition towards a fossil-free energy system here and now.

When will Ingrid capacity build a new battery storage facility in Sweden?

As a next step, Ingrid Capacity is about to commence the construction of another 13 new battery storage facilities in Sweden by the end of 2024, with a capacity of 196 MW/196 MWh, further strengthening the Swedish electricity grid in the SE3 and SE4 price areas.

How many MW of battery storage will be added by 2025?

Another 344 MW was due to be added by 2025, according to the Confederation of Finnish Industries. "Currently, there are over EUR 7bn worth of planned investments into battery storage," said Janne Peljo, chief policy adviser at the organisation. In Denmark, there are no official figures on how much battery storage capacity is currently installed.

How much battery storage capacity is installed in Denmark?

In Denmark, there are no official figures on how much battery storage capacity is currently installed. However, the Danish Energy Agency estimated in 2023 that 63 MW of battery capacity would be installed in 2025, rising to 133 MW in 2030.

How much battery storage capacity does Finland have?

Moreover, a survey by Swedish magazine Ny Teknik showed the growth would continue and reach almost 3 GW within a couple of years. Meanwhile, Finland currently had around 200 MW of industrial-scale battery storage capacity, according to TSO Fingrid. Another 344 MW was due to be added by 2025, according to the Confederation of Finnish Industries.

How many batteries are connected to Svenska Kraftnat's ancillary service markets?

At the end of last year, approximately 100 MW of batteries were connected to the Swedish TSO Svenska Kraftnat's ancillary service markets. The installed capacity continues to grow rapidly and would reach above 400 MW at the year end, according to plans seen by Montel.

The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions. Therefore, all parameters are the same for the research and development ...
