

# NMC battery storage supplier quotation in Poland 2030

Are energy storage systems a new technology in Poland?

Energy storage systems are a relatively new technology in the Polish capacity market. They have participated in two auctions so far: making their official debut in 2022 (with 2027 delivery year) and subsequently dominating the competition in the 2023 auction.

How is the battery storage industry changing in Poland?

The Battery Storage industry in Poland is rapidly evolving, driven by the increasing demand for renewable energy and the need for grid stability. Key considerations include the regulatory environment, which is influenced by both European Union directives and national energy policies aimed at promoting sustainable practices.

Which companies are building a battery storage facility in Poland?

Polish utility PGE Group has launched a tender for the design and construction of a battery storage facility with a minimum capacity of at least 900 MWh. Meanwhile, Ukraine's DTEK has completed the acquisition of a 532 MWh battery storage project in southern Poland.

How many GW is secured by new generation capacity market units?

As a result, the total capacity obligations secured exceed 8 GW, with over 1.5 GW attributed to contracts with foreign entities. Approximately 2.5 GW was secured by "new generation capacity market units". This designation, exclusively applied to Li-ion energy storage projects in previous auctions, i.e. to BESS.

The lithium ion battery market reached 900 GWh in 2023, representing 7x growth in lithium ion battery volumes in the past half-decade since 2018, and 20x growth in the past decade since 2013. Volumes treble again by 2030. This data-file ...

As manufacturing capacity expands in the major electric car markets, we expect battery production to remain close to EV demand centres through to 2030, based on the announced pipeline of battery manufacturing capacity expansion as of ...
