What is the 'guidance' for the energy storage industry?

Based on the above analysis, as the first comprehensive policy document for the energy storage industry during the '14th Five-Year Plan' period, the 'Guidance' provided reassurance for the development of the industry.

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

How can the government support research and development in energy storage technologies?

To address the need for long-term research and development in energy storage technologies, collaboration between academia and industry will be necessary. The government may establish a Nodal Agency to coordinate R&D efforts in the field, and funding will be provided through this agency.

What is the 'guidance on accelerating the development of new energy storage'?

Since April 21, 2021, the National Development and Reform Commission and the National Energy Administration have issued the 'Guidance on Accelerating the Development of New Energy Storage (Draft for Solicitation of Comments)' (referred to as the 'Guidance'), which has given rise to the energy storage industry and even the energy industry.

How many provinces and cities in China are implementing energy storage policies?

At present, more than 20 provinces and cities in China have issued policies for the deployment of new energy storage. After energy storage is configured, how to dispatch and operate energy storage, how to participate in the market, and how to channel costs have become the primary issues which plague new energy companies and investors.
